Webinar

Type of Activity:

Student

Brief Description:

The Society for Data Science (S4DS) hosted a webinar titled *"An Overview of AI and the Process to Identify Use Cases,"* led by Hemant Selmokar. The session explored AI fundamentals, strategies to identify use cases, and real-world applications in finance, healthcare, and retail. Hemant Selmokar's insights offered practical frameworks for leveraging AI in business, backed by engaging case studies. An interactive Q&A enriched the session, enabling participants to clarify AI concepts. With 175 registrations and 75+ active attendees, the event highlighted the transformative potential of AI, equipping participants with actionable knowledge for real-world implementation.
